What is MealSlot?

MealSlot is an application aimed at helping the user find new culinary experiences. By gamifying the process of choosing a meal, we strive to point the user new restaurants in their area and recipes they can use at home to broaden their culinary horizons.
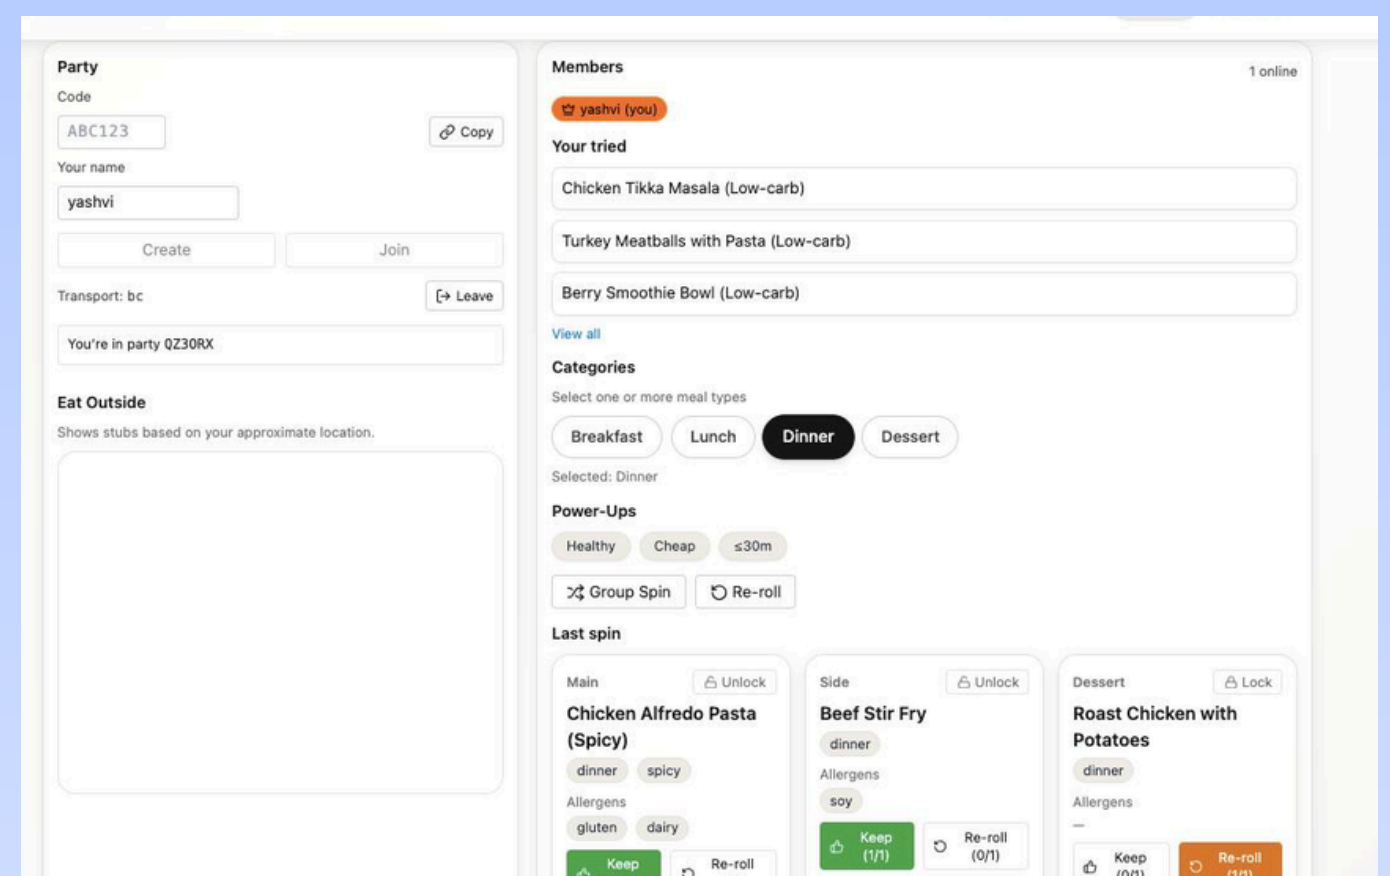

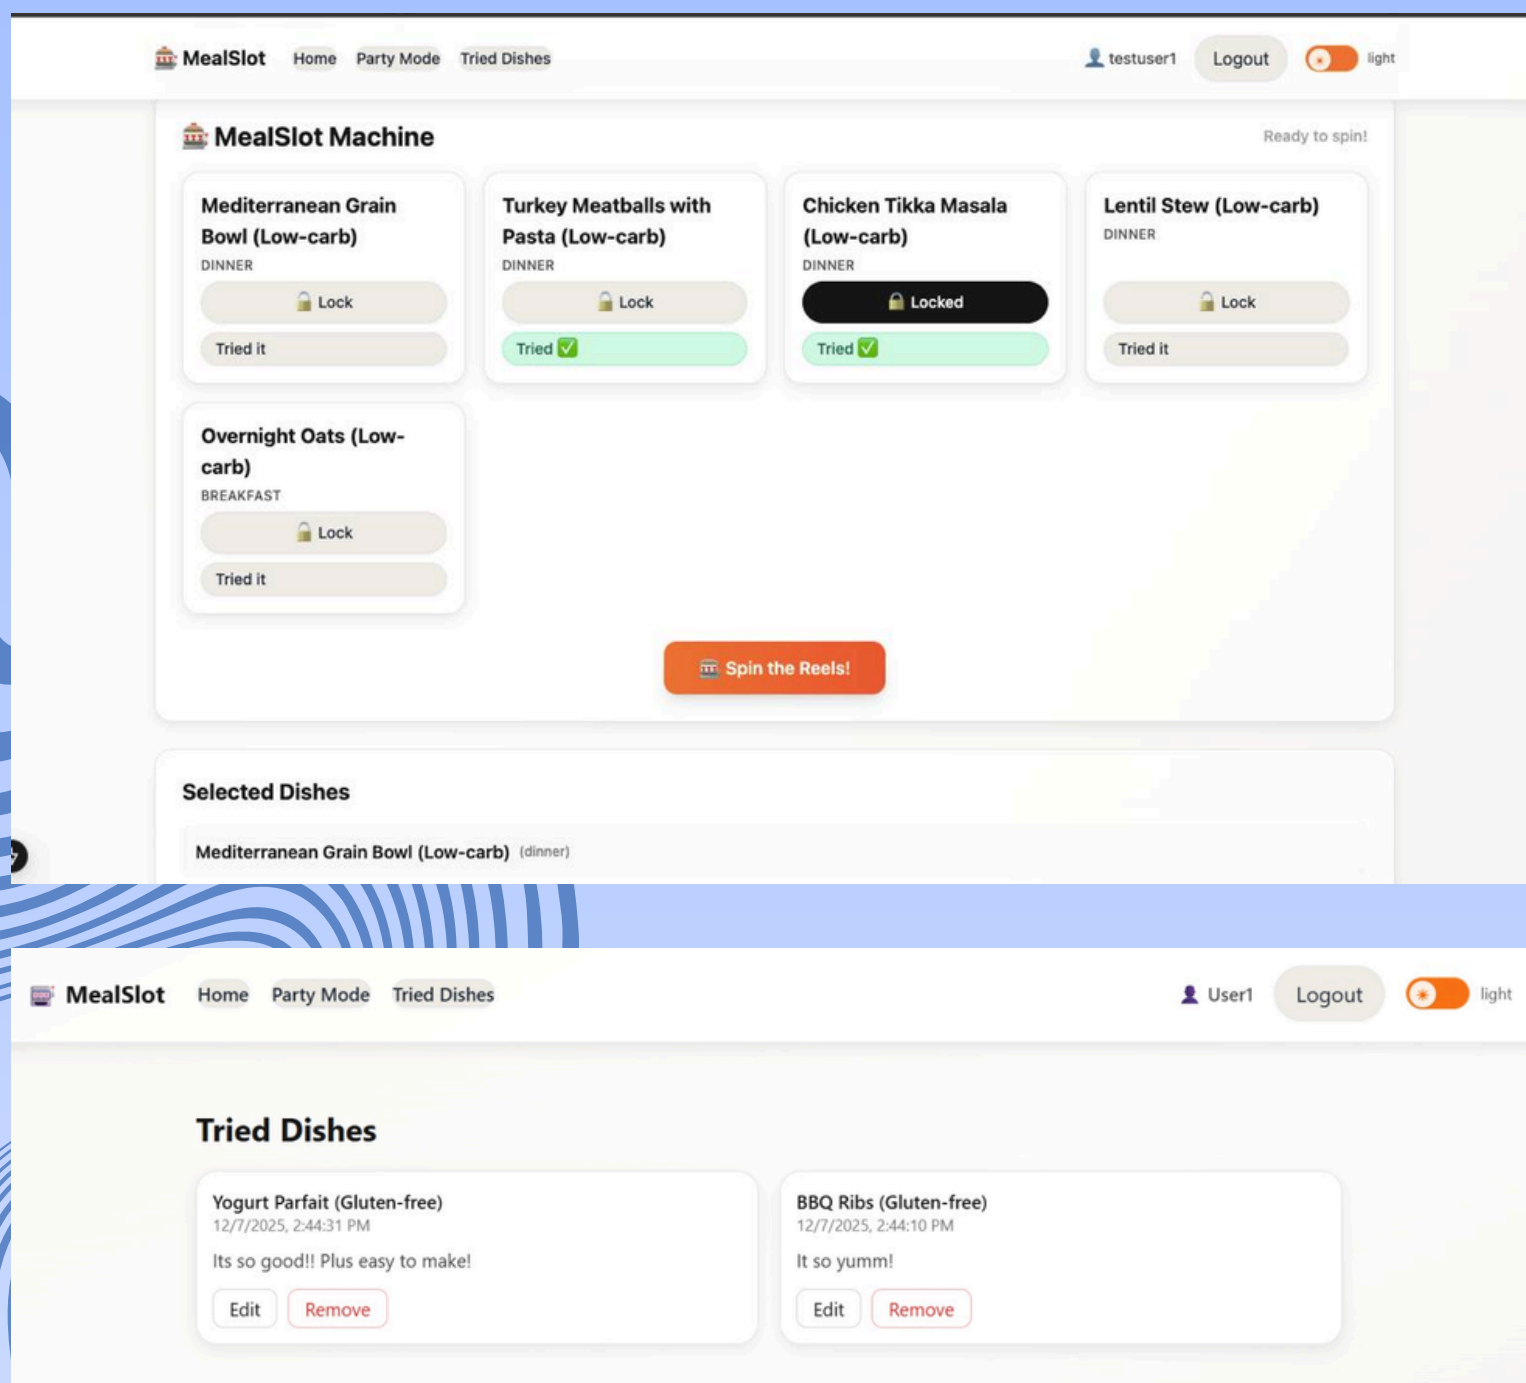

121 Passing Test cases

90% Codecov ✅

Stakeholders

- Customers: Deliver a high quality experience to help users explore new options.
- Restaurants: Increase business by connecting restaurants to customers who may not have been aware of them.
- RecipeCreators:Increase exposure by directing users to their recipes.

Milestones

Previous Milestones –

- Created a mechanism that allows for randomized meal choices (slot machine).
- Allow users to filter meals based on a single meal category and dietary restrictions.
- Provided user with locations to purchase chosen dishes and recipes.
- Allow users to meal plan with multiple people.

Current Milestones –

- Enhanced the UI with smooth animations.
- Allowed selection of multiple categories.
- Created a signup and login system.
- Enhanced the Party mode for coordinated meal planning.
- Allowed users to keep track of and share dishes that they have tried.
- Fixed all badges, including Code Coverage, DOI, and Run Vitest
- Implemented a shell script to run the web app using only 1 command (instead of 10).
